EXPERIENCE

Commude PH— *PHP/Laravel Developer*

August 2020- PRESENT

Lead developer for multiple web projects utilizing PHP Laravel and Vue.js technologies.

- Spearheaded the development of an innovative online driving school platform featuring face authentication using Microsoft's face recognition service.
- Orchestrated the creation of a dynamic Japanese online quiz application using Vue.js, engaging users in interactive learning experiences.
- Designed and implemented robust REST APIs, enhancing the functionality and accessibility of various mobile applications and websites.
- Played a pivotal role as the main developer for internal web systems, optimizing workflow efficiency and usability.
- Contributed significantly to a high-profile exhibition website project for Japanese clients, showcasing technical expertise and cross-cultural collaboration.
- Led the development team in crafting a comprehensive record management system for an Australian school, ensuring seamless data organization and access.
- Successfully integrated a customized Vue.js map system into a WordPress website, enriching user experiences with interactive mapping features.
- Demonstrated exceptional prowess in database management, ensuring data accuracy and integrity.
- Provided ongoing system support and maintenance, ensuring optimal performance and minimizing disruptions.

Elisha Telecom— *Web Developer*

June 2018 – April 2020

Developed dynamic web sites and hybrid mobile applications using PHP (Laravel), JavaScript (Apache Cordova), and relevant libraries.

SKILLS

PHP development using Laravel

Javascript, JQuery, Ajax,HTML, CSS

Database design and management (MYSQL, MSQL, MongoDB)

Wordpress

Swagger

Systems analysis

Project planning and development

Technical support

AWARDS

Backend-developer of the year - 2021 and 2022

- Enhanced software performance by diagnosing and rectifying coding errors and improving user interfaces.
- Executed seamless database management to maintain data accuracy and accessibility.
- Delivered technical support to end users, resolving issues promptly and efficiently.
- Fostered compatibility with third-party software by creating custom programs for seamless integration.
- Designed and implemented REST APIs, enabling efficient data exchange between applications.
- Successfully integrated payment gateways such as First Data and Worldpay, enabling secure and streamlined payment processing.
- Led system support and maintenance efforts, ensuring continuous operation and performance optimization.
- Produced comprehensive technical documentation to facilitate knowledge sharing and future development.
- Displayed adaptability by taking on additional tasks to alleviate peers' workloads, consistently meeting deadlines.
- Undertook system maintenance for the company website, ensuring up-to-date information and a smooth user experience.

EACOMM — Jr. *Web Developer*

November 2017 - April 2018

- Modified an existing hybrid calculator app for a building materials company using Apache Cordova.
- Modified the design and functionality of an existing farm management system.
- Programmed the functionality of a beaglebone device.

EDUCATION

Polytechnic University of the Philippines, Sta. Mesa Manila— *Bachelor Of Science in Information Technology*

2014-2018

PROJECTS

Highlighted projects where I assumed a lead developer role, driving key initiatives to success.

Auto-Academy Driving System

Japanese online driving system featuring video lessons and a cutting-edge face authentication feature.

Jikkyo Quiz App

Interactive quiz application utilizing Vue.js, complete with a repository of stored

questions spanning multiple subjects.

.I-CAN System

Comprehensive school system dedicated to monitoring and managing students' physical activity records.

.Showbiz System

Music-focused social media system, fostering community engagement and interaction around musical content

Sammy News System

Specialized content management system tailored for efficiently organizing and managing anime-related news and information

PALDOS / Nezuko

Inventory system driven by extensive API integrations, optimizing efficiency and accuracy.

Liese-color system

Hair coloring system featuring analysis to determine the most suitable hair color for individual users

Kameda Father's day

Simple mobile application enabling seamless uploading and conversion of series of photos into captivating slideshow greetings

Bizcomm System

Internal system for streamlined management of employee-related records, enhancing organizational processes

Hello Akachan

Online shopping system for baby-related goods, leveraging extensive API integration to enhance user experience and product availability
